

1. Getting familiar with jQuery:

1. What you can do with the jQuery?

When we use jQuery, for example in websites it makes the javascript much more easier.

2. How it can help you as web developer?

It might help me to save time in animations and in making websites.

3. If you think our earlier participant list app, in what kind of issues you could use jQuery?

We could use it to get input value from the users and also check if the user has pressed the button or not.

3. What are CDNs? What kind of benefits you get if you use them?

CDN is a shortcut of Content Delivery Network, we might load websites faster that uses CDNs.
