5. Adding stuff

c. HTML5 specification introduces new semantic elements. One of them is a <figure> element. Can you say why you should use it in addition to standard <img> elements?

To mark up images, videos, codes etc.., that might be used with a caption in there.

3. RWD in practice

After you have done the basic layout, how could you prevent user zooming the site on mobile?

We can use the following code, `<meta content='width=device-width, initial-scale=1.0, maximum-scale=1.0, user-scalable=0' name='viewport' />`
